How do you cast the list **A** to the set **a**?

- ⦿ a=set(A)

- ◯ a=A.dict()

- ◯ a.set()

Consider the Set: **V={'1','2'}, what is the result of V.add('3')?**

⦿ {'1','2','3'}

◯ {'1','2'}

◯ {1,2,3}

what is the result of the following: **'1'** in {'1','2'}

○ False

◉ True
